Cumulus Media and Signal Hill Insights' Podcast Download – Spring 2022 Report

Key areas of focus

Cumulus Media | Westwood One and Signal Hill Insights commissioned MARU/Matchbox to survey weekly podcast listeners in April 2022 for our latest Podcast Download Report. Here are the major questions we sought to address:

- What is the profile of weekly and heavy podcast listeners?
- How are Podcast Newcomers (started listening in past year) distinct from Podcast Pioneers (4+ years)?
- Platform usage: What are the latest shifts in preferred platform? How does that vary by segment?
- Podcasts with video: What are listener preferences? To what extent do they watch or listen to them?
- How interested are podcast listeners in engaging and interacting with their favorite hosts and podcasts?
- How engaged are podcast listeners with ad-free video streaming services?
- Advertiser Perceptions: What is the current state of podcast advertising consideration and usage?
- What are consumer attitudes towards podcast advertising?
- How they feel about the types of ads they hear?

Methodology

Cumulus Media and Signal Hill Insights' Podcast Download – Spring 2022 Report represents the eighth installment in the series, with the inaugural report dating back to July 2017.

This study was fielded online using a nationally representative sample of 604 respondents who met the following criteria:

- Persons 18+
- All respondents spent at least one hour listening to, or watching*, podcasts within the past week
- Respondents were not employed in the advertising, public relations, marketing, market research, radio, television, digital, or podcasting industries
- Surveys were conducted from April 1-7, 2022

* This is the 1st year that respondents could qualify for the Download by saying they ""watched"" a podcast in the past week. In total, 10% of the sample qualified by saying they watched but didn't listen to podcasts in the past week. Wherever trending comparisons are made to previous waves, results exclude respondents who qualified only by saying they watched a podcast in the past week.

Key takeaways

- **The shakeup continues in the podcast platform wars:** Growing interest in video podcasts has helped to propel YouTube to edge out Spotify as the platform used the most by weekly podcast listeners. Heavy listeners continue to use Apple Podcasts most often.
- **Most weekly podcast listeners now prefer watchable podcasts:** Driven by Podcast Newcomers, more listeners prefer podcasts with video they can actively watch or minimize to listen in the background vs. podcasts that have audio only with no video.
- **Women and younger demos are coming into podcasting:** More than half of Podcast Newcomers who have started listening in the last year are 18-34 and more than half are women.
- **Podcast video ads offer an attentive alternative to linear TV ads:** Among listeners who watch video podcasts, more say their eyes are on the screen when ads are playing than what Nielsen studies have shown among linear TV viewers.
- **Podcast advertising captures hard-to-reach, on-demand video consumers:** Weekly podcast listeners are also heavy viewers of ad-free video streaming services.
- **Podcast listeners are eager to interact and engage with their favorite podcasts:** Most weekly listeners follow hosts on social media and plan to attend live podcast events. When considering paid subscriptions, they value exclusive content/access ahead of an ad-free experience.
- **Funny and entertaining ads offer a creative opportunity:** While podcast listeners remain highly receptive to podcast ads, they say they prefer funny and entertaining podcast ads to the more rational ads focused on features/benefits they currently hear more often.

Key takeaways

- **The shakeup continues in the podcast platform wars:** Growing interest in video podcasts has helped to propel YouTube to edge out Spotify as the platform used the most by weekly podcast listeners. Heavy listeners continue to use Apple Podcasts most often.
- **Most weekly podcast listeners now prefer watchable podcasts:** Driven by Podcast Newcomers, more listeners prefer podcasts with video they can actively watch or minimize to listen in the background vs. podcasts that have audio only with no video.
- **Women and younger demos are coming into podcasting:** More than half of Podcast Newcomers who have started listening in the last year are 18-34 and more than half are women.
- **Podcast video ads offer an attentive alternative to linear TV ads:** Among listeners who watch video podcasts, more say their eyes are on the screen when ads are playing than what Nielsen studies have shown among linear TV viewers.
- **Podcast advertising captures hard-to-reach, on-demand video consumers:** Weekly podcast listeners are also heavy viewers of ad-free video streaming services.
- **Podcast listeners are eager to interact and engage with their favorite podcasts:** Most weekly listeners follow hosts on social media and plan to attend live podcast events. When considering paid subscriptions, they value exclusive content/access ahead of an ad-free experience.
- **Funny and entertaining ads offer a creative opportunity:** While podcast listeners remain highly receptive to podcast ads, they say they prefer funny and entertaining podcast ads to the more rational ads focused on features/benefits they currently hear more often.

Recommendations

- **Podcasters and publishers need to include video in their podcast planning:** As podcast listening grows, it picks up new listeners who use YouTube as their one-stop entertainment/information destination. Spotify's recently expanded access to video for all creators will provide more choice for listeners who want podcasts to which they can either listen or watch. Even audio-only podcasts should consider video trailers as a tool to drive discovery to their audio feeds.
- **Prepare for new opportunities to monetize podcasts with video:** YouTube's rumored addition of RSS feeds will boost download totals for podcasts. And, even though listeners often listen rather than watch video podcasts, video ads on podcasts can command more viewer attention than ads on linear TV.
- **Capitalize on listeners' deep engagement with their must-listen podcasts:** Paid subscriptions can add revenue without necessarily sacrificing ad dollars. Exclusive content (e.g., bonus episodes, extended episodes, early release) is a bigger driver than ad-free content. Listeners are looking forward to attending live podcast events, providing another touchpoint and revenue stream.
- **Advertisers can use podcasts to reclaim consumers lost to ad-free video streaming:** As an on-demand medium, podcasts deliver heavy viewers to on-demand video streaming. 88% of weekly podcast listeners say they have watched an ad-free video streaming service in the past month.
- **Enhance podcast advertising creative with more of a funny and entertaining approach:** Podcast listeners say they are more likely to hear rational feature/benefit podcast ads. They prefer funny and entertaining ads. In Paul Feldwick's book *Why Does The Pedlar Sing? What Creativity Really Means In Advertising*, he says, "Advertising is at least as much showmanship as it is salesmanship [and it] builds brands best when it is entertaining, popular and memorable, when it is not just a pitch, but a performance."
